**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9 and 13, drawn to an apparatus, classified in class 15, subclass 383.
  - II. Claims 10-12, drawn to a method of cleaning a vent, classified in class 134, subclass 22.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus which does not include a swivel cuff means such as a fixed cuff means.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Keith Nowak on 8/9/04 a provisional election was made with traverse to prosecute the invention of Group II, claims 10-12. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 1746

Claims 1-19 and 13 are withdrawn from further consideration by the examiner, 37

CFR 1.142(b), as being drawn to a non-elected invention.

***Drawings***

5. Figures 1, and 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Figs. 1 and 3-4 should be labeled as prior art since the figures are identical to what is being disclosed in U.S. patent 4,792,363.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 10-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Franklin Jr. (4792363).

In reference to claims 10-12, refer claims 10-12 of Franklin Jr. et al. since upon review the instantly presented claims are **IDENTICAL** to that disclosed in the Franklin patent.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harvey et al., Melendres, Williams, Nolan et al., Watanabe, Crutcher et al., Allen et al., and Weber et al. teach a duct cleaning device. Karlstrom teaches a vacuum cleaning unit.
